

Adopt a School Garden® (ASG) Grow Kits

School garden programs help young people grow — mentally, emotionally, socially, and physically. They create a space that allows learning to take place outside of the traditional classroom setting. School gardens help students connect with nature. They encourage children to make healthy food choices. They provide a natural context for teaching the entire range of subject matter including, math, social studies, natural science, so much more. Gardens create an environment where learning comes alive and where book knowledge becomes experiential. By selecting one or more of these **ASG Grow Kits** for your school, you've become part of the growing movement across America to place A Garden In Every School®. Together we can help change children's lives. To select an **ASG**

Grow Kit, visit www.garden.org/asg and follow three simple steps. You can always browse our online catalog at www.GardeningWithKids.org to select your own items. Your gift purchase is fully tax deductible.
